X20 Suppressor

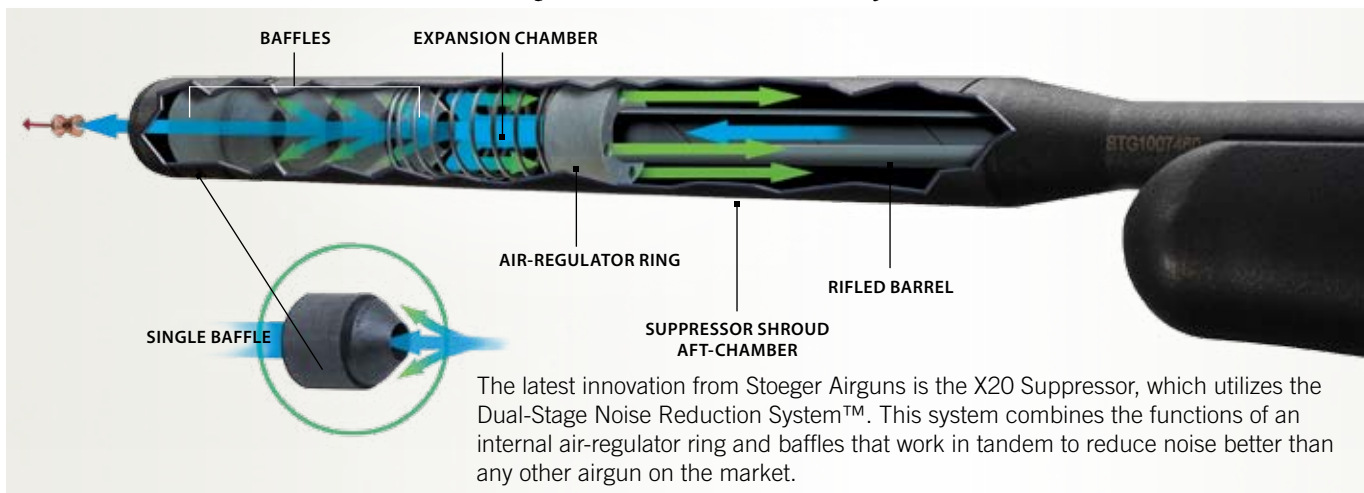

Quietest Airgun in its Class

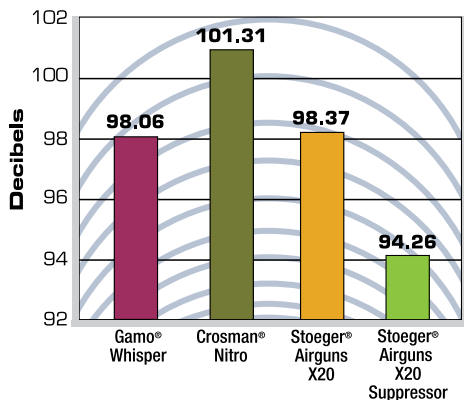

X20 SUPPRESSOR SYNTHETIC – .177 CAL, 1200 FPS & .22 CAL, 1000 FPS
(Includes 4 x 32 Illuminated red/green scope)

Stoeger Airguns incorporate the very best in style and performance. The X20 Suppressor's operating system has been thoroughly tried and tested for toughness and durability, and has been chosen for its long-lasting reliability and ballistic precision. The cocking action is accomplished with a break-open barrel that relies on a simple spring and piston pairing. Stoeger Airguns neither require, nor rely on expensive CO₂ cartridges or pre-compressed air bottles to operate. This makes them both economical to shoot and dependable in function. The latest innovation from Stoeger Airguns is the X20 Suppressor. Employing Air Flow Control (AFC) technology, the Dual-Stage Noise Reduction System, designed by world-renowned silencer designers Humbert CTTS, makes it the quietest airgun in its class.

Dual-Stage Noise Reduction System™

The latest innovation from Stoeger Airguns is the X20 Suppressor, which utilizes the Dual-Stage Noise Reduction System™. This system combines the functions of an internal air-regulator ring and baffles that work in tandem to reduce noise better than any other airgun on the market.

Based on tests conducted and certified by F-Squared Laboratories an independent testing laboratory. (Tests performed in a certified anechoic chamber.)
